100 + 1 in 2021 | Centennial Celebration  
Friday, September 10 and Saturday, September 11, 2021

The 100 (or 101!) anniversary of any organization is something to be celebrated! The Idaho State University College of Pharmacy began with just three students in the basement of Swanson Hall at what was then the Idaho Technical Institute. Through innovation, commitment and determination, the College of Pharmacy now boasts 4,500+ graduates, three campus locations, and can be credited for driving change that has led to multiple advances in pharmacy practice for the residents of both Idaho and Alaska.

You have been such an important part of our 101-year history, and we would be delighted to spend the weekend of September 10 and 11 with you in Pocatello, where we will reflect on fond memories, share our stories, and celebrate with you, our honored guests.

Please see the weekend’s itinerary on the included invitation. Additional information is contained in this sheet.

**Please make sure to RSVP using the included card, or online at:**

**Chu Lectureship and Tauscher Executive in Residence**
- The Chu lectureship is supported by a generous gift from Dr. David Chu and family. Dr. Chu was a 1970 MS graduate of the ISU College of Pharmacy. The Chu Lectureship was created in part “To secure an expert in the field of biomedical research and/or drug discovery to deliver lectures, programs and scholarly programs to the students and faculty in the College of Pharmacy of Idaho State University.”

- The Tauscher Executive in Residence was created by Gary and Judith Tauscher. Gary is a 1962 graduate and retired Eli Lilly executive. Although Gary passed away in December 2019, his legacy lives on with the Executive in Residence which provides finances to have an executive from the pharmacy or healthcare industry present to current student pharmacists the wide variety of career options that they may pursue upon graduation. The executive provides valuable perspective about the current issues and pressures that exist in the healthcare environment and the role of pharmacy there.
